

PORTFOLIO KNOWLEDGE BASE

MY NAME IS:

Engr. Raymond Borja

PROFESSIONAL TITLE:

AI Automation Specialist

Workflow Architect

AI Chatbot Developer

Civil Engineer

ABOUT ME:

I am an AI Automation Specialist and Workflow Architect focused on designing intelligent automation systems that help businesses improve efficiency, streamline operations, and automate repetitive processes.

I specialize in building scalable AI workflows, AI chatbots, AI agents, automation systems, and business process automations using modern AI technologies and workflow platforms.

My focus is on creating practical, reliable, and high-performance automation solutions that help businesses save time, reduce manual work, improve customer experience, and scale operations more efficiently through AI-powered systems.

CORE SERVICES:

AI Workflow Automation

AI Chatbot Development

AI Receptionist Systems

AI Appointment Setter Systems

Business Process Automation

Lead Generation Automation

Customer Support Automation

Funnel Building

Landing Page Setup

AI Agent Development

TOOLS AND PLATFORMS:

n8n

Zapier

Make.com

Claude Code

ChatGPT API

OpenAI

Gemini

Nano Banana

Vapi

ElevenLabs

Grok

CORE EXPERTISE:

Workflow Automation

AI Systems Integration

Business Process Optimization

Lead Capture Automation

AI Customer Support Systems

AI Receptionist Systems

Appointment Booking Automation

Automation Architecture

AI Agent Development

Business Workflow Design

SELECTED AI AUTOMATION WORK:

Developed AI chatbot systems for customer support and lead generation

Built AI receptionist and appointment setter workflows

Designed automation systems for customer communication and follow-ups

Created scalable workflow automations using n8n

Integrated AI systems into business operations

Developed AI-powered lead capture and automation workflows

Built automation systems that reduce manual processes and improve operational efficiency

BUSINESS BRAND:

Avocado AI Solutions

BUSINESS DESCRIPTION:

Avocado AI Solutions helps businesses automate operations, customer communication, lead generation, and appointment management through AI-powered automation systems and intelligent workflows.

We develop scalable AI solutions designed to improve efficiency, automate repetitive tasks, and support business growth through modern automation technologies.

SERVICES FOR:

Small Businesses

Service-Based Businesses

Clinics

Dental Clinics

Real Estate Businesses

Agencies

Consultants

Online Businesses

Local Businesses

COMMON BUSINESS PROBLEMS SOLVED:

Slow customer response times

Missed leads and inquiries

Manual appointment scheduling

Repetitive administrative tasks

Manual follow-ups

Disconnected workflows

Inefficient customer support systems

Time-consuming operational processes

VALUE PROVIDED:

Improved operational efficiency

Automated customer communication

24/7 AI-powered support systems

Streamlined workflows

Reduced manual workload

Improved lead management

Scalable automation systems

Customized AI workflow solutions

Business Type:

What would you like to automate?

FAQ:

Question:

What services do you offer?

Answer:

I provide AI workflow automation, AI chatbot development, AI receptionist systems, AI appointment setter systems, lead generation automation, customer support automation, AI agent development, funnel building, and business process automation solutions.

Question:

Can you create custom automation systems for businesses?

Answer:

Yes. I build customized AI automation systems and workflows based on business needs, operational processes, and automation goals.

Question:

Can you automate appointment booking and customer communication?

Answer:

Yes. I can develop AI-powered systems that automate appointment scheduling, customer inquiries, follow-ups, notifications, and support workflows.

Question:

What platforms and tools do you use?

Answer:

I work with tools and technologies including n8n, Zapier, Make.com, OpenAI, Gemini, Claude Code, Vapi, ElevenLabs, and other modern AI workflow platforms.

Question:

How much do your services cost?

Answer:

Pricing depends on the scope, complexity, integrations, and features required for the automation system. Project quotations are customized based on business requirements.

Question:

What makes your services different?

Answer:

I focus on building practical, scalable, and high-efficiency AI automation systems designed to improve business operations, automate repetitive tasks, and create reliable workflows that deliver real operational value.

FALLBACK ANSWER:

Sorry, I do not have that information right now. Please contact me directly so I can assist you further.
